

BRINGING JOY & PURPOSE TO ORPHANS

ACADEMIC UPDATES FOR MAY 2024

Lifesong Harmony Schools: The academic calendar for Lifesong Harmony Chipata, Garneton, Kawama, Gap-Year, and Votec schools commenced Term 2 on May 6th, 2024. This report outlines the key activities and achievements of the term, highlighting the institutions' continued dedication to nurturing future leaders. The term break was shortened to one week to compensate for the extended interruption experienced during the cholera outbreak in the earlier part of the year.

Children Served

Student Achievement: One of our notable successes this term is the graduation of a student by the name of Charity Katongo from Northrise University's School of Nursing.

This achievement is particularly praiseworthy as it represents the realization of a long-held dream for Charity, underlining the effective support and guidance provided by the Lifesong for orphans.

Kharis House support: The school's commitment to helping student support was evident in the case of Aretha Chiti (Grade 9), an underage student who became pregnant. She has been integrated into Kharis House, where she is receiving the necessary support and care while awaiting the birth of her child. This initiative ensures that the student continues to receive spiritual and emotional guidance during this critical period.

100%
TO CARE FOR
ORPHANS

Labour Day Celebration: On May 1st, 2024, Lifesong staff actively participated in the Labour Day celebrations held at Mindolo Dam about 25 Km from Kitwe. The event highlighted the value of hard work and dedication. The staff's involvement was recognized with acknowledgments for their contributions to the student's care. This celebration highlighted the staff's commitment and the positive impact of their efforts on the students' spiritual, academic, and emotional growth.

Vocational Trade School: In a significant development this term, the Vocational Trade School introduced two new trades: Electrical and Auto Mechanics. This expansion provides students with a wider range of vocational training opportunities, aligning with modern industry demands and enhancing their employability. The inclusion of these trades is a strategic move to diversify the skill sets of students and better prepare them for various career paths in the technical and engineering sectors.

Program

Prayer focus: Student Health. This month, two students faced significant health challenges:

- **Fredrick:** A first-year student at Northrise University has been dealing with a serious medical condition. Under the care of Dr. Mingocho and her team, Fredrick has been receiving treatment at specialized hospitals. The Ministry is committed to ensuring that he receives the best possible care to support his recovery.
- **Kelvin:** A Grade 12 student experiencing a spinal issue has also been under medical care. The Ministry, along with healthcare professionals, is dedicated to providing the necessary medical support to aid in his recovery and ensure he can continue his studies with minimal disruption.
